Automation.bh

Seminar

AI for real estate and property management

From answering buyer enquiries to tenant requests and listings, see where AI saves time in real estate.

Real estate teams handle a constant stream of enquiries, viewings, contracts and maintenance requests. This seminar shows how AI agents and automation can respond faster and keep every lead followed up.

What you will learn

- Instant replies to property enquiries
- Automatic viewing bookings and reminders
- Tenant requests and maintenance tracking
- Writing listings and marketing with AI

Agenda

1. Registration and coffee
2. Where real estate teams lose leads
3. Live demo: enquiry to viewing
4. Property management automation
5. Questions and discussion
