Webinar

Using AI safely: data, privacy and governance

Practical rules to use AI tools and agents without putting your data, customers or reputation at risk.

AI brings real gains, but also new risks. This webinar gives you a simple framework to decide what data can be used, who approves what, and how to keep humans in control.

What you will learn

- The main risks: data leaks, wrong answers and bias
- A one-page AI policy for your company
- Human approval and audit trails for agents
- Choosing tools and vendors carefully

Agenda

1. Why governance matters (10 min)
2. Risks and real examples (15 min)
3. A simple governance framework (20 min)
4. Questions and answers (15 min)
